DRUM:
Digital Preservation

Terry M. Owen
DRUM Coordinator
28 April 2010
What is an Institutional Repository?

SPARC definition:

“A digital collection capturing and preserving the intellectual output of a single or multi-university community.”

Attributes of a Repository

- Institution-based
- Open access
- Managed by libraries
- Variety of content
DRUM Background

- Initial proposal to Provost from ULC May 2003
- Mission: store, index, distribute, and preserve the research works of UM faculty
- Launched in August 2004
  - 1,100 documents
  - 9,600+ documents as of April 2010
- Developed using DSpace
  - open source
  - active user community
  - out-of-the-box implementation
DuraSpace

- Merger of DSpace Foundation and Fedora Commons in 2009
- Continue to support and grow DSpace and Fedora
- New offering: DuraCloud
  - Hosted service based on cloud computing
  - Add features to support access, preservation, re-use, and sharing of content
  - Scheduled release for fall 2010
Welcome to the repository for University of Maryland research.

Any UM Faculty member can make digital works permanently accessible and available across the Internet with DRUM. Find out more about depositing your work.

The following communities of digital works are available:

Collections Organized by Department

A. James Clark School of Engineering
College of Agriculture & Natural Resources
College of Arts & Humanities
College of Behavioral & Social Sciences
College of Chemical & Life Sciences
College of Computer, Mathematical & Physical Sciences
College of Education
College of Information Studies
Philip Merrill College of Journalism
Robert H. Smith School of Business
School of Architecture, Planning, & Preservation
School of Public Health
School of Public Policy
University Libraries (faculty)

NIH Public Access Policy

In early January 2008, the National Institutes of Health (NIH) announced a revision to its Public Access Policy that ensures that published results of NIH-funded research are publicly available.

Effective April 7, 2008, all peer-reviewed articles arising from NIH funds are required to be submitted to PubMed Central within 12 months of publication. Please visit the NIH Public Access site for further information.

Thesis/Dissertation Deposit Timeline

New submissions to the thesis/dissertation collections are added automatically as they are received from the Graduate School. Currently, the Graduate School deposits all theses and dissertations from a given semester after the official graduation date. This means that there may be up to a 4 month delay in the appearance of a given thesis/dissertation in DRUM.

ETDs – Electronic Theses and Dissertations

- Mandatory since September 2003
- Submitted via the Web in PDF form
- Automatically deposited in DRUM
- Also available via ProQuest’s *Digital Dissertations*
ETD Embargo Options

- Restrict access for one year
  - Patent protection
  - Publish journal article

- Restrict access for six years
  - Publish book

- Restrict access indefinitely
  - Requires written approval by the Dean of the Graduate School
DRUM Deposit Policies

- Depositor must be a UM faculty member
- Depositor must have the ability to assign needed rights to UM
- Deposits must be substantive works of scholarship
- Deposits must be complete and able to stand alone as a work or collection (no notes, etc.)
- No restrictions on file formats
DSpace Preservation Tools

- Format registry
- Checksum generator
- Handles
- Logs
How Does DRUM Work?

- UM faculty members deposit their work in DRUM
- Paper is uploaded and bibliographic record is created
- Full text of the submitted work is indexed via Google and other search engines

Title: ETDs in Lock-Down: Trends, Analyses and Faculty Perspectives on ETD Embargoes

Authors: Owen, Terry M. Hackman, Timothy Harrod, Thomas

Type: Presentation

Keywords: ETDs electronic theses and dissertations embargoes open access University of Maryland

Issue Date: 10-Jun-2009

Abstract: Since September 2006, graduate students at the University of Maryland have had the option of restricting access to their ETD in the university’s digital repository (DRUM) for either a one- or six-year period. Embargo requests must be approved by the student’s faculty advisor and submitted to the Graduate School prior to uploading the ETD. Since the beginning of the program, an average of 32% of the ETDs that have been submitted each semester have been embargoed. While Engineering has the largest number of embargoes (150), Chemical and Life Sciences has the greatest percentage (54%), followed closely by Agriculture and Natural Resources (51%) and Business (47%). The College of Arts and Humanities, specifically the English Department, has the largest number of six-year embargoes (75). Faculty advisors who had approved at least one embargo request since 2006 were surveyed to gain insight into their perspectives on publicly available ETDs and ascertain their reasons for approving embargo requests. In general, faculty advisors indicated that they approve ETDs without attempting to change the students’ choice of embargo period, indicating that the student plays a major role in deciding whether or not to embargo their ETD. In addition, faculty stated that the primary reason for approving embargoes was to protect opportunities for future publication. While the percentage of embargoes has remained relatively constant each semester, our goal is to decrease the number of embargoes by educating faculty and students on the benefits of making their research widely available. We are working with the Graduate School and library faculty to develop a scholarly communications program that not only educates faculty and graduate students about the consequences of embargoes, but also makes them more aware of open access issues in general.

Since September 2006, graduate students at the University of Maryland have had the option of restricting access to their ETD in the university’s digital repository (DRUM) for either a one- or six-year period. Embargo requests must be approved by the student’s faculty advisor and submitted to the Graduate School prior to uploading the ETD. Since the beginning of the program, an average of 32% of the ETDs that have been submitted each semester have been embargoed. While Engineering has the largest number of embargoes (150), Chemical and Life Sciences has the greatest percentage (54%), followed closely by Agriculture and Natural Resources (51%) and Business (47%). The College of Arts and Humanities, specifically the English Department, has the largest number of six-year embargoes (75).

Faculty advisors who had approved at least one embargo request since 2006 were surveyed to gain insight into their perspectives on publicly available ETDs and ascertain their reasons for approving embargo requests. In general, faculty advisors indicated that they approve ETDs without attempting to change the students’ choice of embargo period, indicating that the student plays a major role in deciding whether or not to embargo their ETD. In addition, faculty stated that the primary reason for approving embargoes was to protect opportunities for future publication.
Faculty Outreach

- Participate in New Faculty Orientation
- Letter and email campaign to UM faculty maintaining links to papers from personal web pages
- Research centers and institutes
- Work extensively with librarian liaisons
Barriers to Depositing in DRUM

- Redundancy
- No time
- Copyright confusion
- Fear of plagiarism
- Work associated with inconsistent quality
- Publishers might not accept articles for publication if freely available
Why Deposit in DRUM?

1) Research can be found, read, and used by a global audience
2) Greatly increases the chances of the research being cited
3) Access is maintained with a permanent URL
4) Able to link to the permanent URL from any web page; no need to maintain files or changing URLs on personal web sites
5) Easy to deposit works along with associated content
6) Allows any researcher to locate documents of interest quickly and easily from any computer at any location
Preservation

- Libraries has no *formal* policies/procedures in place for digital collections
- DRUM is backed up regularly
- Some formats have been migrated
  - Majority of files are PDF
  - PostScript → PDF
- Issues with audio files from School of Music
  - Low quality .mp3 or .cda files
  - Prefer .wav files
- New Preservation Librarian
Electronic Theses & Dissertations

- Maintain non-circulating print copy in Maryland Room of Hornbake Library

ETD Preservation Archive

- MetaArchive & NDLTD (Networked Digital Library of Theses and Dissertations)
- Pilot program Jun 2008-May 2010 to examine collaborative preservation efforts
- Document best practices for ETD preservation readiness
- Establish and populate an ETD Archive
