The United Nations and the Universal Declaration of Human Rights

Q1. As you may know, the members of the UN General Assembly have agreed on a set of principles called the Universal Declaration of Human Rights. Some people say the United Nations should actively promote such human rights principles in member states. Others say this is improper interference in a country's internal affairs and human rights should be left to each country. Do you think the UN SHOULD or SHOULD NOT actively promote human rights in member states?
