ARCHAEOLOGY IN ANNAPOLIS
LEVEL REPORT

Site: 108 EASTERN AVE

Date: 10-10-04

Square: UNIT 1 N259 E188

Excavator(s): JAN BRODEUR
KELSEY CREECH

Level: A

KELLEY BARR

Recorder: JAN BRODEUR
KELSEY CREECH

Opening Elevations: NE .2

Closing Elevations: NE .42

NW .1

NW .10

Instrument Height: C .31

Instrument Height: C .60

SE .54

SE .65

.43 SW .37

.43 SW .46

Level Definition:

Munsell: 10 YR 3/3

Texture: Sandy loam

Soil description (inclusions, other comments):

Some weeds, some dead grass, but mostly bare soil; has sand inclusion (10 YR 2/1)
Gradient between 10 YR 3/3 and 10 YR 4/4 on W side

Associated Features and Levels:

Concrete slab and burned wood

Level above: —

Level below: B

Bag number: 47

Artifacts: large piece of green glass (about 2" across), large piece of amber engraved glass (about 1 1/2" across), broken glass and bottles, many pieces of coal, mortar, nails, burned wood, pieces of tin foil, a few pieces of broken ceramics.

Interpretation:

Could be outdoor burn pit for trash; perhaps refuse from a previous internal fire

Photographs:

Level Definition:

Munsell: 10yr 3/4 (dark yellowish) 10yr 5/6 (yellowish brown) Texture: some iron corrosional
Soil description (inclusions, other comments): sandy loam, mottled with clay discolouration

Associated Features and Levels:

FEATURE 8 LEVEL B

Level above: D
Level below: F

Bag number: 58

Artifacts: Nails, traces of coal (small fragments)

Interpretation:

Due to the rare findings in this level, we decided that we had basically hit the subsoil. The soil was extremely clayish and even moist. Thus, we interpreted level E as the last level of excavation.

Photographs:

Feature Description: Post Hole? → circular ring of lighter dirt.
Munsell: 10 YR 4/4 DARK YELLOWISH BROWN
Soil texture: clay loam

Soil description (inclusions, other comments):
 Soil is a lighter brown than the rest. Matches the marbled type soil found in the earlier levels.

Bag number: #59
Artifacts: None

Interpretation: May be a possible post hole. At the end, it did not appear to be a level however, a part of level E. After getting into level E and the transition soil we have found that it is taking a more definite shape and may very well be a post hole (see graph on separate sheet)

Level Definition:

Munsell: 10 YR 4/6

Texture: Sandy loam
w/ clay matting

Soil description (inclusions, other comments):
large roots

Associated Features and Levels:

Feature 7

Level above: A
Level below: S06

Bag number: 55

Artifacts: Shards of glass, fragments of coal; oyster (discarded),
fragments of brick (discarded), nails/screws, fragments of
earthenware

Interpretation:

There were much fewer artifacts in level B, and the
soil was very clayish. Perhaps the slope of the
yard caused some erosion, which would explain the
dramatic decrease in artifacts in level B. The coal
indicates that fuel was being burned, and the brick, nails,
glass provide evidence of a some sort of structure.

Photographs:
