Samuel Kerstein

Samuel Kerstein, Department of Philosophy, College of Arts and Humanities, teaches “Contemporary Moral Issues” (PHIL 140) once a year. Rather than requiring a textbook that students must purchase, Kerstein provides PDF files of articles and book chapters on his CANVAS site for the course. In seven years, no students have complained about this practice. The course often uses the very same material that is anthologized in expensive textbooks. Kerstein provides the pedagogical help sometimes contained in textbooks by posting an...

Principles of Economics

Table of Contents | Instructor Resources | Student Resources | Details | Errata

Principles of Economics covers scope and sequence requirements for a two-semester introductory economics course. The authors take a balanced approach to micro- and macroeconomics, to both Keynesian and classical theories, and to the theory and application of economics concepts. The text also includes many current examples, which are handled in a politically equitable way.

5.1 Price Elasticity of Demand and Price Elasticity of Supply

Summary

Both the demand and supply curve show the relationship between price and the number of units demanded or supplied. Price elasticity is the ratio between the percentage change in the quantity demanded (Qd) or supplied (Qs) and the corresponding percent change in price. The price elasticity of demand is the percentage change in the quantity demanded of a good or service divided by the percentage change in the price. The price elasticity of supply is the percentage change in quantity supplied divided by the percentage change in price.
Cicero, On Pompey's Command (De Imperio), 27-49. Latin Text, Study Aids with Vocabulary, Commentary, and Translation
Ingo Gildenhard, Louise Hodgson, et al.

This course book offers a portion of the original Latin text, study aids with vocabulary, and a commentary. Designed to stretch and stimulate readers, the incisive commentary will be of particular interest to students of Latin at both AS and undergraduate level. It extends beyond detailed linguistic analysis and historical background to encourage critical engagement with Cicero's prose and discussion of the most recent scholarly thought.

Program Summary

In 2009, the American Recovery and Reinvestment Act amended the Trade Act of 1974 to authorize the Trade Adjustment Assistance Community College and Career Training (TAACCCT) Grant Program. On March 30, 2010, President Barack Obama signed the Health Care and Education Reconciliation Act, which included $2 billion over four years to fund the TAACCCT program.

TAACCCT provides community colleges and other eligible institutions of higher education with funds to expand and improve their ability to deliver education and career training programs that can be completed in two years or less, are suited for workers who are eligible for training under the TAA for Workers program, and prepare program participants for employment in high-wage, high-skill occupations. Through these multi-year grants, the Department of Labor is helping to ensure that our nation's institutions of higher education are helping adults succeed in acquiring the skills, degrees, and credentials needed for high-wage, high-skill employment while also meeting the needs of employers for skilled workers. The Department is implementing the TAACCCT program in partnership with the Department of Education.

Announcements

- **04-16-2014**: The Obama administration will award $450 million in grant funds to expand job-driven training partnerships between community colleges and employers. Grants are the final installment of a $2 billion, four-year initiative. Read the press release here.
Update: As of July 12, 2016, the rule is under review by the White House Office of Management and Budget. A final action on the rule is expected in November 2016.

The U.S. Department of Education (ED) is the first Federal agency to propose an open licensing policy for grant-funded educational resources. ED announced the proposed rule and call for public comments in the Federal Register on November 3, 2015. The rule is currently under final review by the White House, and a final action is expected in late 2016.

Pierce professor saves students $1 million through open education resources

January 9, 2015  Features, Lead Story  4 Comments

After years of teaching math, Professor David Lippman was sick of requiring his students to pay upwards of $150 for a textbook. Used books were available at a slight discount, but students were forced to pay an extra fee to access online support materials unless they purchased a brand new copy.

Lippman, who began teaching at Pierce in Fall 2000, finally made the decision to move away from the lessons found in traditional textbooks. He began to carefully write and compile his own content, which he now provides to students at little to no cost.

“I basically sat down and, over a period of time, began to write my own text to replace the book for my Math 107 course,” he said. “I would hardly call that first version a formal textbook, but I wrote up enough content to reach the point where I didn’t need a book.”

Tidewater Community College is making college more affordable.

The cost of college textbooks has risen 812% since 1978, more than the rates of inflation, health care, new home prices, and college tuition.

More and more, college students are unable to afford their textbooks, and as many as 70% of students have reported avoiding buying at least one textbook for their courses. Not surprisingly, these students do not do as well academically.

As of May 2013, if a TCC student purchased all of the textbooks required for a business administration degree, that student would spend $3,678.95 on new books. While used textbooks may lower this price, their availability is, at best, uneven.

But the problem with printed textbooks goes beyond financial cost; textbooks “cost” students and teachers in other ways as well.

Because textbooks are frequently written for broad audiences in the hopes that they will fill the learning support needs and be adopted by large numbers of faculty and departments, they are filled with content and exercises that are superfluous to a specific course’s learning outcomes. The cost here is in teaching efficiency and effectiveness.
Open Educational Resources (OER) Degree Initiative

The Open Educational Resources (OER) Degree Initiative seeks to boost college access and completion, particularly for underserved students, by engaging faculty in the redesign of courses and degree programs through the replacement of proprietary textbooks with open educational resources. Over the next three years, the Open Educational Resources Degree Initiative will lay the groundwork for nationwide adoption of OER Degrees.

PROJECT MANAGEMENT FOR INSTRUCTIONAL DESIGNERS

ABOUT PM4ID

Project Management for Instructional Designers (PM4ID) is — as the name suggests — a book about project management tailored specifically for instructional designers. This book is a revise/remix of a pre-existing, openly licensed project management textbook which was donated to the commons by a benefactor that desires to be attributed as Anonymous.

PM4ID includes many new features and improvements to the original book, including:

- Alignment of book chapters with the PMBOK, which supports readers in preparing for the Project Management Professional certification,
- A series of video cases of project managers working in the instructional design area, integrated into every chapter,
- Multiple versions of the book, including HTML, PDF, ePub, Kindle, and a text-to-speech mp3 audio version of the book,

What are Open Educational Resources (OER)?

Open Educational Resources are educational materials and resources offered freely and openly for anyone to use and, under some licenses, to re-mix, improve and redistribute.

Open Educational Resources include:
Open Textbook Library

Make a difference in your students' lives with free, openly-licensed textbooks.

Textbooks every student can access and afford

Open textbooks are textbooks that have been funded, published, and licensed to be freely used, adapted, and distributed. These books have been reviewed by faculty from a variety of colleges and universities to assess their quality. These books can be downloaded for no cost, or printed at low cost. All textbooks are either used at multiple higher education institutions; or affiliated with an institution, scholarly society, or professional organization.

The Open Textbook Library is supported by the Center for Open Education and the Open Textbook Network.

(3) **support** faculty to adopt, adapt, and create OER
The high cost of commercial print textbooks is a major concern for both students and their parents. To address these concerns, the Provost's Office and the University Libraries launched the Open Education Initiative in the Spring of 2011. The Open Education Initiative is a faculty incentive program that encourages the use of existing low-cost or free information resources to support our students’ learning. Information Literacy will also be emphasized, creating opportunities for students to develop and practice the skills of critical thinking, reasoning, communication, and integration of knowledge and perspectives.

Now in its third phase, the Open Education Initiative has generated a total savings of over $750,000 for students in classes that utilize open educational resources and library material. For more information please contact Marilyn Billings at mbillings@library.umass.edu.
