

EXAMINING THE EFFECT TO HIGHWAYS AND STRUCTURES BY VEHICLES
EQUIPPED WITH LIFT AXLES

By

Ti Awna Brittany Moffatt

Thesis submitted to the Faculty of the Graduate School of the
University of Maryland, College Park, in partial fulfillment
of the requirements for the degree of
Master of Science
2010

Advisory Committee:

Dr. Chung C. Fu, Advisor/Chair

Dr. Amde M. Amde, Professor

Dr. Mohamad S. Aggour, Professor

Table of Contents

Table of Contents.....	ii
List of Tables.....	iv
List of Figures.....	v
Chapter 1: Introduction.....	1
1.1 Problem Statement.....	1
1.2 Research Objectives and Scope of Work.....	2
1.3: Research Approach.....	3
Chapter 2: Literature Review.....	6
2.1 Lift Axle Usage.....	6
2.2 Truck Policies.....	8
2.2.1: National Truck Policies.....	8
2.2.2: International Truck Policies.....	10
2.3: Structural Capacities based on Failure Mode.....	12
2.3.1: Punching Shear Approach.....	13
2.3.2: Yield Line Approach.....	14
2.3.3: Girder Analysis of Bridge Girders.....	16
2.3.4: Potential Pavement Damage Approach.....	17
Chapter 3: Policy Research.....	20
3.1: Maryland Truck Size and Weight Regulations.....	20
3.1.1 Dump Service Registered Trucks.....	21
3.2: National Survey Results.....	22
3.2.1: Lift Axle Survey.....	22
3.2.1.1: Vehicle Weight Policies.....	24
3.2.1.2: State Truck Regulations and Deterioration by Trucks.....	27
3.2.1.3: Lift Axle Regulations.....	28
3.3 Canadian Survey Results.....	31
Chapter 4: Theoretical Approach.....	32
4.1: Statistical Analysis Assumptions.....	32
4.2: Punching Shear Approach for Bridge Deck.....	35
4.3: Yield Line Theory for Bridge Deck.....	36
4.4: Girder Analysis of Bridge Girders.....	39
4.5: Potential Pavement Damage Approach.....	41
Chapter 5: Data Analysis.....	45
5.1: Punching Shear Results.....	45
5.2: Yield Line Results.....	47
5.3: Girder Analysis Results.....	49
5.4: Pavement Damage Results.....	51

Chapter 6: Summary and Conclusions.....	55
6.1: Summary.....	55
6.2: Conclusions and Recommendations.....	56
Appendix	
Appendix A: Reference Tables and Figures.....	57
Appendix B: Lift Axle Survey Results.....	63
Appendix C: Analysis Calculations.....	90
Bibliography.....	103

List of Tables

Table 2.1: Lift Axle Survey Results by NCHRP Report 575.....	10
Table 2.2: Three Axle Truck Weight Provisions	11
Table 5.1: Punching Shear Capacity for 3-Axle Tridem Rear Axle Configuration.....	45
Table 5.2: Punching Shear Capacity for Tandem Axle Rear Axle Configuration.....	46
Table 5.3: Tridem Axle to Tandem Rear Axle Ratio.....	46
Table 5.4: Lift Axle Punching Shear based on Percent Loading.....	46
Table 5.5: Tridem Axle Computations for Bending Moments	47
Table 5.6: Tandem Axle Computations for Bending Moments.....	48
Table 5.7: Summary of Tandem to Tridem Axle Moment Ratios.....	48
Table 5.8: Bending Moment Summary for Tandem and Tridem Axle Configuration.....	49
Table 5.9: Flexible Pavement ESAL Calculation Summary.....	53
Table 5.10: Rigid Pavement ESAL Calculation Summary.....	53

List of Figures

Figure 2.1: 4-Axle Dump Truck with Lift Axle and 7-axle Truck with Lift Axles.....	7
Figure 2.2: Yield Line Pattern from Uniformly Loaded Simply Supported Slab.....	15
Figure 2.3: Concept of Pavement Performance Using Present Serviceability Index.....	18
Figure 3.1: Map of State Survey Responses.....	23
Figure 3.2: Graph of Survey Response for Question 1.....	24
Figure 3.3: Survey Responses for State Compliance with FBF B Law on Interstates.....	25
Figure 3.4: Survey Responses for State Compliance with FBF B Law on Local Roads.....	25
Figure 3.5: Survey Responses for Annual Percent (%) of Overweight Vehicles.....	26
Figure 3.6: Lift Axle Regulation Survey Responses Question 14.....	29
Figure 3.7: Survey Responses for Lift Axle Control System Specifications.....	30
Figure 4.1: Distribution of Total Trucks for June 2010 from Virtual Weigh Station.....	32
Figure 4.2: Distribution of Trucks with New Bounds.....	33
Figure 4.3 Distribution of Trucks with New Bounds 65,000 to 70,000 lb.....	33
Figure 4.4: Distribution of Lift Axle Weights for the 65,000 to 70,000 lb Range.....	35
Figure 4.5: Examples of Yield lines Notations.....	38
Figure 4.6: Moment Regions of a Simply Supported Slab.....	39
Figure 5.1: Truck Axle Loading Configuration.....	45
Figure 5.2: Maximum Live Load Moment of the Tandem and Tridem Axle Configurations.....	50
Figure 5.3: Typical Cross Section of Conventional Flexible Pavement.....	51
Figure 5.4: Typical Cross Section of Asphalt Pavement.....	51
Figure 5.5: Typical Cross Section for Rigid Pavement.....	52

Figure 5.6: Pavement Damage Calculations for Single Tandem and Tridem Axles.....	54
Figure 5.7: Pavement Condition with respect to Time for Environmental Serviceability Losses.....	54
Figure A. 1: State Axle Weight Limits from NCHRP 575.....	A-2
Figure A.2: Specialized Hauling Vehicle Weight Exemption Summary by NCHRP Report 575.....	A-3
Figure A.3: Table 6 of NCHRP 575 with FBF B State Posting Checks (I).....	A-4
Figure A.4: Table 6 Continuation of NCHRP 575 with FBF B State Posting Checks (II)...	A-5
Figure A.5: NCHRP Summary of State Posting that Exceed the Federal B Gross Weight Limits.....	A-6
