

**APPENDIX B**  
*Students' Project Interests*

<b>Ethnicity</b>	<b>Student</b>	<b>Connection to interest</b>	<b>Individual topic</b>	<b>Group topic</b>
African American	Femi	HIV and other sexually transmitted diseases (STDs) in <b>family history</b>	Will Gardasil really guard me?	Comparing HIV & Ebola
African American	Wesesa	Overweight and health- related issues in <b>family history</b>	Microbes, genetics, & diet/exercise influence on weight	Gene therapy
African American	Juji	General <b>personal</b> inquiries of how microbes affect the world	Microbes and how they affect global warming	Biofuels in modern society
African American	Roble	<b>Personal</b> interest in how microbes affect health and disease	Antimicrobial products & microbial resistance	Probiotics
Asian American	Lei	Overweight and health- related issues in <b>family history</b>	Chocolate & microbes	Probiotics
Asian American	Long	Cancer and STDs in <b>family history</b>	Lung cancer	Comparing HIV and Ebola
Asian American	Rui	Diabetes in <b>family history</b>	Where did the insulin go? Diabetes today	Gene therapy
Asian American	Tadao	Movie-making <b>career</b> dreams	Possible life on mars	Biofuels in modern society
Asian American	Caitlin	<b>Personal</b> interest in getting into shape and losing weight	Weight management	Weight & microbes: Causes of obesity
European American	Brandi	<b>Career</b> dreams in government and politics	Biological weapons & scientific censorship	Biological weapons & scientific censorship
European American	Hugh	<b>Career</b> dreams in government and politics	Antimicrobial use and the fatally ill	Biological weapons and scientific censorship
European American	Reuben	<b>Career</b> dreams in business and politics	Gene therapy: A cure or curse?	Gene therapy
European American	Freya	<b>Family history</b> of health issues related to weight and digestive disorders	Organic produce and Escherichia coli	Effects & pathways of E. coli contamination

<b>Ethnicity</b>	<b>Student</b>	<b>Connection to interest</b>	<b>Individual topic</b>	<b>Group topic</b>
European American	Cathy	<b>Personal</b> interest in getting into shape and losing weight	The role of organisms in weight regulation	Weight & microbes: Causes of obesity
European American	Debbie	<b>Personal</b> interest in getting into shape and losing weigh	Gut microbes and their effects	Weight & microbes: Causes of obesity
European American	Emma	<b>Personal</b> interest in getting into shape and losing weight	Obesity, your fault? Maybe not.	Weight & microbes: Causes of obesity
European American	Eilene	<b>Personal</b> interest in getting into shape and losing weight	Botox: Harmful or helpful?	Probiotics
European American	Gannon	<b>Personally</b> affected by HIV	Anti-retroviral agents in treating HIV infection	Comparing HIV and Ebola
European American	Karina	General <b>personal</b> inquires of how microbes affect the world	Genetically mutated food crops: BT corn	Biofuels in modern society
European American	Linnea	<b>Personally</b> affected by arthritis and weight-related health issues	Rheumatoid arthritis	Biological weapons & scientific censorship
European American	Liza	<b>Personal</b> interest in generally improving health	Listeria testing methods	Effects & pathways of E. coli contamination
European American	Ozzie	General <b>personal</b> inquires of how microbes affect the world	Ways can microbes be used to create biofuels?	Biofuels in modern society
European American	Perla	<b>Personal</b> interest in generally improving health	Microbes and milk	Probiotics
European American	Remington	<b>Personal</b> interest in generally improving health	The negative health effects of eating moldy bread	Effects & pathways of E. coli contamination
European American	Susannah	<b>Personally</b> affected by H. Pylori and STDs	H. Pylori and stomach cancer	Comparing HIV and Ebola
European American	Todd	<b>Personal</b> interest in generally improving health and how microbes affect society	Possible danger in genetically modified foods	Biological weapons & scientific censorship
