

Appendix G – 18AP105 Unit level and Feature forms

ARCHAEOLOGY IN ANNAPOLIS
LEVEL REPORT

Site: 520 Third St

Date: 10-24-04

Square: UNIT 5 N95 E45

Excavator(s): EM, SM, LK

Level: A (surface)

Recorder: EM

Opening Elevations: NE .70

Closing Elevations: NE 0.61'

NW .75

NW 0.71'

Instrument Height: C .68

Instrument Height: C 0.58'

.70 (datum stick) SE .73

.71 (datum SE 0.47'

SW .75

SW 0.56'

sticks)

Level Definition: surface, mulch, top soil

Munsell: 10YR 2/2 very dark gray brown

Texture: ashy, sandy
sandy loam

Soil description (inclusions, other comments):

shells, coal fragments, slag...sandy

Associated Features and Levels:

N/A

Level above: N/A
Level below: B

Bag number: 41

Artifacts:

Interpretation: we dug this unit because it is adjacent to the SE corner of unit 4, where there is a (great) feature. Hopefully we will expose some more of the feature in unit 4.

Photographs:

B/W Roll/Frames: camera broken

Color Roll/Frames: 12-13

Instrument Height: C 1.9'
.71' SE 1.81'
SW 1.82'

Level Definition:

Munsell: (NE) 10YR 6/4 DARK YELLOWISH BROWN Texture: Ashy

(NW) 10YR 3/3 DARK BROWN

Soil description (inclusions, other comments): Ashy, many inclusions

Associated Features and Levels: Associated with level B at Unit 4 which is adjacent with Unit 4

Level above: A
Level below: C

Bag number: 41

Artifacts: Pottery, nails (huge), brick, Ashy inclusions

Interpretation: This level coincides with the level B in Unit 4 which was under the flower-bed. This level includes much debris, and we are hoping the trench in Unit comes over to Unit 5.

Photographs:

Level Definition:

Munsell: 10 YR 3/3 Dk. BROWN

Texture: Loam

Soil description (inclusions, other comments):

Associated Features and Levels:

*This is the EAST end of UNIT 4,
the SIDE OUTSIDE the footprint
of the shed.*

Level above: Ø
Level below: C

Bag number: 43

Artifacts: coal, glass, old metal bowl, beer can, ballpen, pipe stem, terracotta, brick
garden tags, garden stake (discarded) 2 1/2' long

Interpretation:

*The northern 1/3 of the unit contains a disturbed layer of burned coal and other
refuse less disturbed than the other units placed along the N100 line.
Further investigation should offer answer regarding the use for this area.*

Level Definition:

Munsell: SANDY LOAM 10YR 3/2 *very dark grayish brown* Texture: SANDY LOAM

Soil description (inclusions, other comments): FREQUENT COAL, OCCASIONAL oyster shell, rare mortar/brick

Associated Features and Levels: NONE

Level above: Ø
Level below: B

Bag number: 29 (old + new)

Artifacts: whitewares, nails, clear glass, green glass, plastic, bottles/cops, glass marbles, wood, bricks, paperclip, pottery + A lot of slag / UID metal.

Interpretation: OUR UNIT IS ADJACENT TO UNIT 1 WHO IS FARTHER THAN US. THEY HAVE FOUND (LIKE US) A SIGNIFICANT AMOUNT OF TRASH / ARTIFACTS. IT IS MY OPINION THAT THE PREVIOUS OCCUPANTS USED THIS AREA. BOTH UNITS INCLUDED (ABOUT A 10x10 AREA) AS A TRASH PIT. THE SOIL CONSISTED OF SANDY LOAM WITH LITTLE TO NO VARIATION. WE FOUND A HUGE AMOUNT OF COAL (LIKE HOWEVER, I NOTICED A LACK OF OYSTER SHELLS).

0.71' SE 1.50
SW 1.40

Level Definition:

Munsell: 10YR 3/3 ^{DARK}
BROWN

Texture: sandy loam

Soil description (inclusions, other comments):

lots of bits of rocks, wood
(starting to marble w/ 10YR 4/6 at mid level of B)

Associated Features and Levels:

Seem to be coming down on
another quarter of Feature 1
in NE corner.

Level above: A
Level below: C

Bag number: 33

Artifacts: Winchester Shell Cartridge casing, marble
A few (10-30) pieces of glass, ceramics
A couple of handfuls of rusted metal nails?

Interpretation:

there is still question as to if this unit contains part of feature 1;
there is definitely fill on SW corner, layer B was pretty disturbed - artifacts
were not found in context. Much, much, much inclusions of coal &
clayiness.

Feature Description:
 Munsell: 10YR 7.5/2.5 yellowish brown

Soil texture: sandy loam

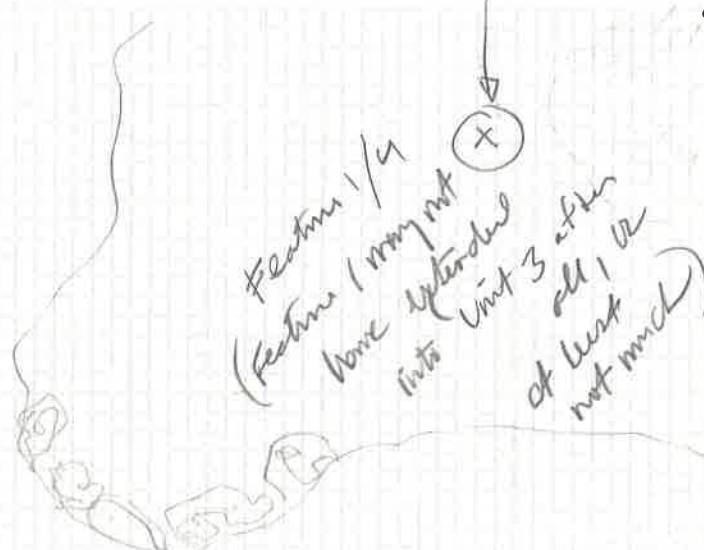

Soil description (inclusions, other comments): Level A almost all inclusion; crushed mix of shells, ash + pink

Bag number: #36

Artifacts: Section of large-diameter metal pipe; assortment of 28 nails of various sizes - incl. 5" spike; 9 shards of glass (incl. milk glass); 7 shards of ceramics; 1 segment of wire insulator; green.

Interpretation: Level A seems very disturbed + disordered; lenses of varying thicknesses distributed throughout, covering @ least 2 different sub-levels. Inclusion-rich soil, large area of level A; level B is much smaller featurewise.

 Instrument Height: (C) 2.36'
 SE
.70' SW

Feature Description:

Munsell: 10 YR 3/6 Dark Yellow Brown

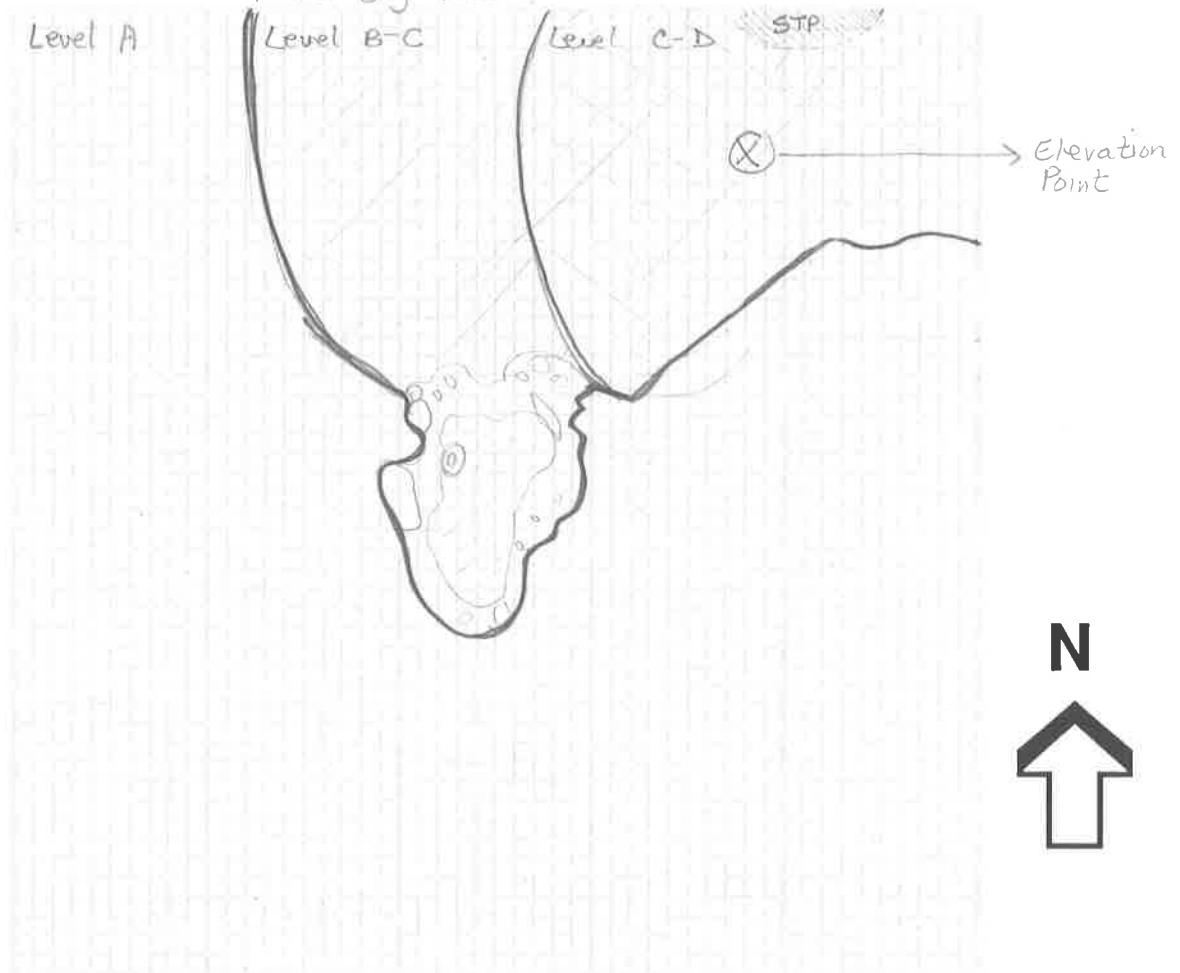

Soil texture: Sandy Loam w/ Sandy Clay Lenses

Soil description (inclusions, other comments): small inclusions of coal shreds, large artifacts included; clay lenses - much distance from original fill, feature 3 advent, + STP.

Bag number: 47

Artifacts: Broken metal flask, whole glass bottle, several plastic or shell belt buckles

Interpretation: New info seems that feature 3 may be survey pipe, meaning survey was recent, disturbance patterns don't match idea of Feature 1 being a pit - because large clay deposit near center - perhaps feature 1 is in unit 1 mostly, + new soil stains indicate trench??
Mud dig more!

Feature Description:

Munsell: 10YR $\frac{3}{4}$ Dark Yellowish Brown, soil stain
 10YR $\frac{2}{2}$ Dark Yellowish Brown, Clay Deposit

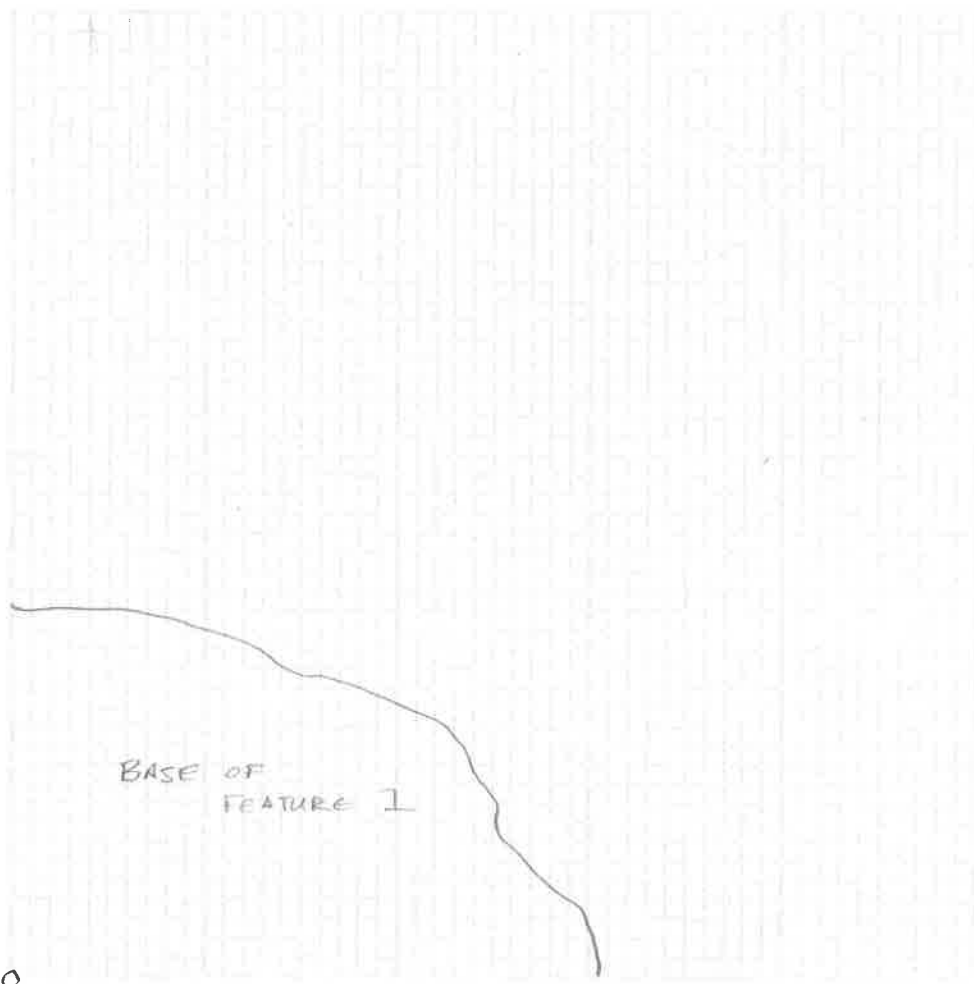

Soil texture: Soil stain is Sandy loam
 Clay deposit is Sandy Clay

Soil description (inclusions, other comments):
 Mottled intermediate, its texture is loam

Bag number: 48

Artifacts: small "get's it" bottle - intact; shards of peardware + of flint blue; very fragile copper...?; shards of ceramics; manganese bottle base, large unknown metal canister.

Interpretation: Features: 1 + 3 + separate feature-type occurrence @ Soil Stain. Buried pre-WWI manganese glass base w/ pickup + some unknown corroded metal pipe or canister. About 4" (disturbed but artifactually sterile) between bottom of feature 1 + top of feature D.

Munsell: 3/3 10YR Dark Brown

Texture: Sandy Loam

Soil description (inclusions, other comments):

Lots of coal/coke. Very small amount of bits of oyster shells.
Numerous roots of different sizes running throughout unit

Associated Features and Levels: Ø

Level above: Surface

Level below: B

Bag number: #24

Artifacts:

Glass - 31

Fabric - 1

NAILS - 7

PLASTIC - 23

Ceramic - 5

Twine - 1

Mortar - 17

BEAD - 1

Bone? - 5

UID METAL - 5

UID MAN MADE BUILDING MATERIAL - 1

Interpretation:

Finished taking off the top layer. Some 20th century artifacts were found. Next layer clearly shows a color change and clayier texture. Lots of coal were found. Few oyster shells. Numerous roots cut through the layers.

Soil description (inclusions, other comments): Coal, Oyster Shell, Potomac River Stones & mortar

Associated Features and Levels:

NONE.

Level above: A
Level below: C

Bag number: 25

Artifacts: Glass → brown, green bottles, cup rim, 19th & 20th cent
Nails/UID/Metal → spikes, nails, chain, can rim; 100+ count
Bone → teeth, associated bone → 17
Plastics → buttons, knobs, toy parts; 30 pieces
Ceramic → redware, whiteware, porcelain, clay pigeon, tile
• 2 1/2 clay marbles, 2 glass marbles
• bullet casing
• 1894 penny → Indian Head

Interpretation: Soil changed to clay mottling. In this level, there was a lot of metal, especially nails, as well as several bullet casing and a 1894 Indian Head penny. Also, there was a clay pigeon, marbles, both clay + glass, bone, teeth, a room & jaw.

Soil description (inclusions, other comments):

infrequent coal + oystershell

Associated Features and Levels:

NONE

Level above: B
Level below: -

Bag number: 45

Artifacts:

Nails, 4 glass pipe stem, 4 pottery sherds ...
1 Bone

Nellie's Shoe

Interpretation:

This Level Sucked. A**. There was nothing here but a few nails and a few shards of pottery and a piece of glass or tab. We dug a window in the soil to see how much further we would have to go. The sub soil was so much further down that we decided to dig the test w/ shovels and then level it off.
