

## Acknowledgments

I first want to thank my wife, Kate Hickey, and our children, Michael, Matthew, and Meredith, for their love, support, and understanding during this lengthy project.

I want to thank Nancy Gallagher for many years of mentoring, support and guidance. She selflessly took on these time-consuming burdens. I am profoundly grateful.

I also want to thank the members of the committee for their contributions to inspiring, refining, and completing this project. Thank you to Catherine McArdle Kelleher, Paul Huth, Charles Harry, Alec Worsnop, Celestino Perez, and Anya Fink.

I would like to thank my mother and late father, Alice and John Hickey, my brother, Patrick Hickey, and my sister, Lauren Hickey Cummings, for their love and support.

Thanks to my many friends and colleagues in the University of Maryland, U.S. Army War College, and Carlisle, Pennsylvania communities whose friendship and assistance were invaluable including Doug Winton, Devin Entrikin, Poorti Sapatnekar, Angie Halvorson, Matt Nicaastro, Ed Kaplan, Brett Weigle, Francis Park, Ben Runkle, Kristin Behfar, Kevin Carroll, Sam Corvah, Doug Bennett, Allison Abbe, Patrick Bratton, Jeff Wilson, Kevin McCall, Taryn Faulkner, Naoko Aoki, Cynthia Boruchowwicz, Mac Destler, Mike Sigler, Erik Greve, Elizabeth Mata Lorenzo, Siobhan Kerr, Taryn Faulkner, Chris Hossfeld, Al Lord, Mike Lynch, Grace Stettenbauer, Fred Gellert, Francesca Perry, Bob Bradford, Jonas Seigel, Rob Orr, Robert Sprinkle, Nancy Guevara, Felipe Quero, Jonathan Montag, Maria Bruno, Tyra

Hosfelt, Kaden Hurley, Megan Casey, Adam Shilling, Abigail Stonerock, Mary Bell, Edward Eichelberger, Heather Smith, Dianne Evans, Greta Braungard, Melody Carte, G.K. Cunningham, Gen Lester, George Skerritt, Heather Gregg, Jerad Harper, Keith Burkepile, Derek Martin, Leigh Caraher, Michael Marra, Tim Brown, Tom Spahr, Chris Pesile, and Jim Breckenridge.

Thanks also to Charles Glaser and the many scholars on whose work I drew in this project. I have tried to faithfully restate their contributions to knowledge. Care should be taken to refer back to their work before attributing an issue in this dissertation to their theories as in some cases several concepts have been interwoven or used differently than originally intended. Any problems in such a case would be my responsibility and everything I have found suggests that the theories I have cited are effective and efficient in achieving the purposes for which they were originally intended. I would also like to thank Sky, Rebecca, and their team for proofing work done after the defense, with the permission of the Committee Chair, and Kanyinsola Sanusi for assistance with the conduct of the defense.
