

TECHNICAL RESEARCH REPORT

Design Optimization of Multi-Sink Sensor Networks by Analogy
to Electrostatic Theory

by Mehdi Kalantari, Mark Shayman

TR 2005-112

ISR develops, applies and teaches advanced methodologies of design and analysis to solve complex, hierarchical, heterogeneous and dynamic problems of engineering technology and systems for industry and government.

ISR is a permanent institute of the University of Maryland, within the Glenn L. Martin Institute of Technology/A. James Clark School of Engineering. It is a National Science Foundation Engineering Research Center.
