EXCAVATION UNIT SUMMARY FORM

Page 2 of 2Unit Status: ☐ In Progress☐ Excavated☒ Backfilled

Please list all drawings and profiles not on level and feature forms:

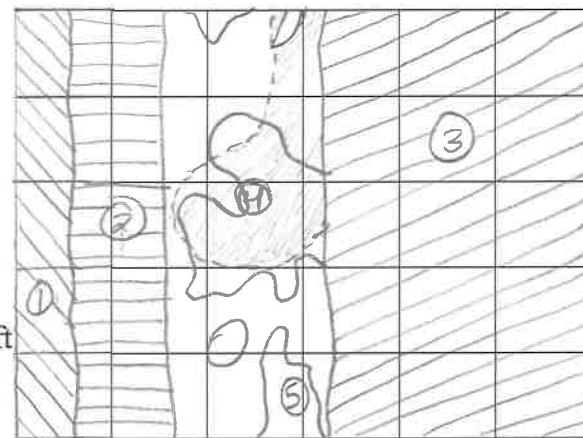

- ① Feature 18 - builder's trench
- ② Feature 20 - gas pipe trench
- ③ Feature 16 - sewer pipe trench
- ④ Feature 19 - building debris
- ⑤ Feature 22 - root stumps

North

Scale:

1 square = 1 ft

Summary Paragraph:

This unit (a 6'x5') was dug in an attempt to discover any remnants of the original 1930s sewer pipe, and perhaps a builder's trench which we could use to date the construction of the house. Dave Barnes had recently replaced the sewer pipe, and there was nothing left of the original trench, although a few broken pipe pieces were found in the feature fill. The builder's trench we found was obviously for the stuccoing of the wall, and there was no builder's trench found for the original wall. The gas pipe was a surprise. This was all 20th century fill and yard surface, combined w/ construction debris.

Level Definition:

Munsell: 10YR 3/6 dk yellowish brown

Texture: sandy loam

Soil description (inclusions, other comments): Level color 3/6 is about the average color

Closer to face soil color deepens + reds,

loose, sandy, 5YR 4/2.5

10YR 3/4

Associated Features and Levels:

Change in soil color, cinders, cement, gravel, + green ceramics

Level above:

Level below: A

Bag number: 40

Artifacts:

Cement, mortar, glass, shell, nails, asphalt, plaster
(sometimes painted), cinders, bits of paper and plastic, not
coal, bone (macrofaunal)

Interpretation:

The cement, and rock fragments may indicate that there was once
a path through this unit,

Uh... I think not, just ground surface + roof debris.

Level Definition:

Munsell: 10 YR 3/6 dark yellow, & brown Texture: clay loam

Soil description (inclusions, other comments): on the border between layers A and B were building materials. Also, some spots of darker, siltier soil was sandwiched in layer A. There were a few shells.

Associated Features and Levels:

Level A was a fill level, it was essentially between sub and Level above: Soil
Level below: B
Level B, most probably used for the garden next to it. Level A is only along the Northern part of the unit.

Bag number: 54

Artifacts: 1 screw, ~5 nails/fragments, cement and roofing fragments. Several more pieces of plaster, as from soil level.
Gardening remains including flower label and paper from soil bag. Button made out of plastic.

Interpretation: Level A was a fill level that Barnes used when planting his front garden. Aside from the roofing gravel, and nails/screw, we believe this level is 20th century. The nails and other artifacts were probably used as fill.

Photographs:

Level Definition:

Munsell: 10YR 3/4
 Soil description (inclusions, other comments):
 Root inclusions that were dark + silty on the North side.

Texture:
Sandy loam

Associated Features and Levels:

Level above: Hard top soil
 Level below:

Bag number: 61

Artifacts: Glass, some shell, coal, nails, screws, metal scraps, green plaster, roofing tile, watchgear, concrete
fake pearl, white ware, milk glass, wood, brick fragment, asphalt, animal bones, plastic staves, perhaps a piece of pottery
 Many of the artifacts (especially the roof tiles, plaster, and roofing tile) were similar to those found in layer A and the soil layer.

Interpretation: From the X-section, the green plaster appears to a footpath to house. Deeper into layer we found pieces of flint cement in a similar spot.

Front lawn appears to have been nothing to important besides a front lawn. The dispersal of minimal artifacts suggests that the front yard was used for only a short walkway and an area near where some construction took place.

not a path
roof debris

Soil description (inclusions, other comments):

Level A and B are not only separated by color + texture, but by a green rubber mat

Associated Features and Levels:

Rubber mat

Level above: ~~Authentic~~

Level below: B

Bag number: Bag 78

Artifacts:

Glass (green, brown, clear), brick, mortar, bone, metal, yarn, shell, a shoulder pad, tile
Wire, plastic ribbon, cork, nails, screws, hanger, strips of metal

Interpretation:

A spot where someone threw a lot of trash at and may have
buried a dead animal, then buried it all. The animal may
have been some kind of bird, due to porousness of bones.
This bird may have been a turkey due to the size
of the back bone pieces.

Subject of drawing: Level D

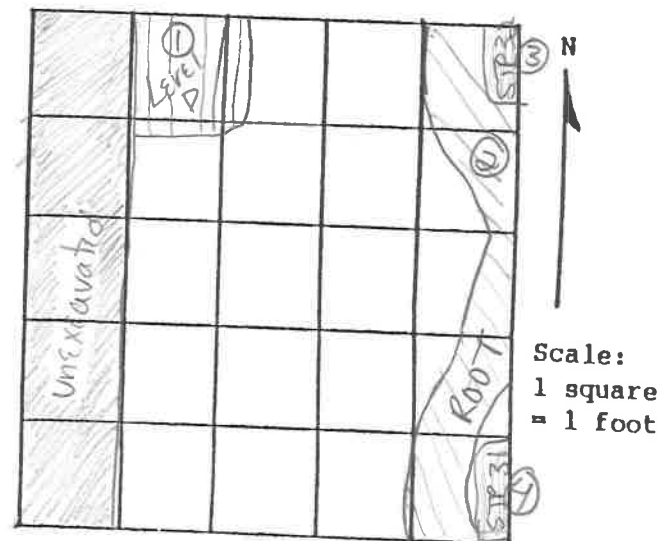

Unit Status:

In Progress ☐ Excavated ☐ Backfilled ☒

Drawings:

Number	Subject	Comments
①	Level D	area of ashy soil w/in Level C
②	Root	lg. root that cut through east side of unit
③	STP # 32	] Previously excavated STPs (6/02)
④	STP # 31	

Summary Paragraph:

This unit was begun because STPs dug earlier in the summer uncovered some midden material. Most of this trash was found in levels A and B, with some in C. The trash was 20th century, most probably from mid-century. A very large root was unearthed that cut through much of the first 1.0' on the east side of the unit; it was too big to cut. Because of a large brick and lumber pile to the west, the unit was only a 4' x 5'. The levels progressed downward evenly. A and B were each about .4' and C was almost a foot deep. A+B were very loamy, while C was hard packed clay loam. D was a shallow ashy layer in C.
